TOP DOCTORS 2010

Here in Connecticut, we benefit from some of the finest health care in the nation. Among all the states, we rank no. 4 in the ratio of doctors per capita and we produce and retain some of the most respected health-care practitioners anywhere. In such an environment, being acclaimed a "Top Doc" by one's peers is a special honor.

We recently sent more than 5,000 questionnaires to doctors from one end of Connecticut to the other, asking them to recommend a doctor to whom they would send a loved one for expert medical care. The result is this year's Top Doctors list. With such a wide array of specialists covered, this issue of Connecticut Magazine makes a very good place to begin your search for medical help.
